

## **SHUFFLE KING II**

The most effective professional card shuffler we've ever built for poker games.

Shuffle King is designed to meet the highest standards of your casino or poker club. The second generation of this prestigious shuffling machine excels in top-level reliability and technical processing. All this under the most favorable price conditions.

## Always ready and reliable

System of two card decks allows you to use one deck in play while the other deck is simultaneously shuffled to be ready for the next deal. The shuffle is governed by a GLI approved random number generator. Game deceleration caused by hand shuffling is eliminated, thereby your rake is significantly increased. Dealer has more time to pay attention to the game. Cards are always shuffled properly.

## Features

- absolutely reliable random shuffle in 35 sec.
- increases game productivity by about 30%
- much better gaming comfort and safety
- easy operation and simple staff training
- automatic recount of cards with each shuffle
- notice of incorrect number of cards
- design matched to gambling room interior

## Technical specification

The shuffling mechanism is designed for one deck of plastic or paper cards of max. size 88 x 63 mm (also narrow cards sized 88 x 57 mm can be processed). Card width can be easily adjusted in user menu. Card shuffling is completely random.

At the end of each shuffling, the total number of cards in the deck is displayed. If the number is different from 52, the dealer will see a notice of an incorrect number of cards on the display.
